

Getting Started Guide

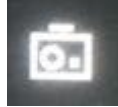

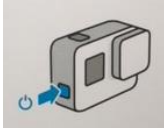

GoPro App

Overview

- Control your GoPro. Use your phone or iPad to frame your shots, start and stop recording, and easily adjust settings.
- Share your favorites. Post your best moments to Facebook, Instagram and more, or share them in a text or email.
- Create a QuikStory. Automatically transform your latest footage into an awesome video with music and effects.
- Delete pictures/videos, select single images from videos.

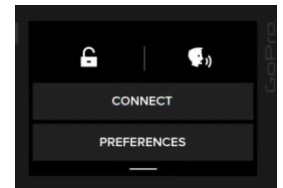

Step by Step

1. Ensure Bluetooth is enabled on your iPad. (Settings>Bluetooth).
2. Open the GoPro app on your device, making appropriate selections for your setting regarding account specifics. 
3. Click the GoPro symbol in the top left corner, and then Add Camera. 

4. Select your GoPro Camera (Hero) and turn the camera on. 

5. Open the Utility Drawer by swiping down on the touchscreen of the camera. 

Select Connect, Select Connect new device and Select GoPro App to see your cameras ID and password

6. Click continue and you will receive a pairing request on your device, Select 'Pair'
7. You will receive a request to join the Wi-Fi network for the GoPro, select 'Join'
8. You are now connected to your iPad device.
9. You can have the same view as the GoPro and control taking pictures and videos.
10. You can now view the pictures and videos on the GoPro by selecting the Grid in the bottom right hand corner, you can edit videos and select single images from videos, you can delete images or videos.

Note Deleting will delete from the SD card memory
