

# Getting Started Guide

## Clips

### Overview

- Clips is a free app that lets you make fun videos. With a few taps you can easily create a video with amazing effects.
- Live Titles
- Artistic effects and filters
- Fun stickers, emoji and posters
- Selfie Scenes with TrueDepth camera
- Smart sharing

### Step by Step

1. Open up the Clips app. You may go straight into starting a project or you can click the file icon (top left) and then select + to start a new project.
2. You can record clips from the camera, take clips using the camera or from the ipads photo library of pictures or videos. For any pictures the clip still needs recording (see below).
3. To record press and hold the big red button, or if you press hold and slide up it will enable you to do continuous recording hands just press the stop button when you are finished.
4. You can place various effects on to the clips prior to the recording of after by pressing the star icon. These include Filters, Labels, Stickers, Emoji's
5. You can record a clip with subtitles of different styles. Select the Live titles icon and the required style. Once the subtitles are recored these can be edited if needed by highlighting the clip with subtitles, selecting the live titles button and editing the content accordingly.
6. On recording the live titles it will record the background sound. If you do not wish to have this on then select the mute function
7. Video clips can be trimmed using the trim icon and clicking the yellow arrow bars at the ends to alter the clip length.
8. Once you have used the required effects click Done (top right hand corner to go back to the recording screen.
9. During recording you can also pinching out and in of the screen to zoom in and out.
10. You can also record posters, selecting the theme you would like and tapping the text to alter it to your requirements, click Apply. You record that as a clip as stated
11. You can add music to your clip video but using the music icon. The soundtracks are royalty free and so can be utilised everywhere. You can also use your own music
12. To share your clip select the upload icon, select either save video (it will save to your photo library)or select another file transfer application such as a cloud drive, mail, message
