Annual Review 2019

20 years of magic

Featuring a special 20th year pull out
Welcome
from the chairman and chief executive

We are delighted to present you with this year’s Annual Review as we begin the celebrations for our 20th year. When the original Lifelites project was founded in 1999, the networked computers we donated were state of the art. It is staggering to think how far we have come since then; that’s technology for you.

We would like to say a huge thank you to all of our loyal supporters; you have been such a crucial part of the Lifelites journey. Please take a few minutes to read what we have been up to this year, and enjoy a step back through time with our special 20th year pull out.

Mike Woodcock
Chairman
Simone Enefer-Doy
Chief executive

What is Lifelites?

Lifelites is the only charity working to enrich the lives of children and young people with life-limiting illnesses and disabilities by donating the latest assistive and inclusive technology, specially adapted for a wide range of needs and abilities. We do this for children at every children’s hospice service across the British Isles. Children and young people are given the opportunity to escape the confines of their conditions and use the technology we donate to play, be creative, control something for themselves and communicate, for as long as it is possible.

We provide all of our equipment along with training for the hospice staff, our technical support helpline and equipment maintenance completely free of charge.
When we visited Jack’s hospice with a full package of brand new technology, he was hesitant at first, but his carers wheeled his bed over to have a go on the Virtual Reality technology and he completely came out of his shell.

When we met Lillie, she played with one of the toys so much we had to change the batteries! She loved dancing along with BeatBo, one of our special switch toys.

Abbie’s movements are restricted due to a complex medical condition, and she is unable to communicate, so her mum was amazed when she was able to use the Lifelites Eyegaze to paint a picture – just using her eyes!

Amelia was delighted when we donated a Mobile Magic Carpet to her hospice. She loved playing with the bright colours and moving images. Just look at that beautiful smile.

Addy has Cerebral Palsy, but that doesn’t stop her spending hours racing over the Mobile Magic Carpet in her wheelchair, which she was still able to play with despite her disabilities. It was wonderful to see her shrieking with laughter as she played with her carers.

William is unable to communicate but loves interacting with his carers when he plays on the Lifelites touchscreen computers at his local children’s hospice. It helps him build relationships even though he is unable to talk.

Our year in pictures

We’re incredibly lucky that we get to meet so many inspiring children when we donate our technology to children in hospices across the country. Here are some of the happy faces we’ve met over the last 12 months:

When we visited Jack’s hospice with a full package of brand new technology, he was hesitant at first, but his carers wheeled his bed over to have a go on the Virtual Reality technology and he completely came out of his shell.

When we met Lillie, she played with one of the toys so much we had to change the batteries! She loved dancing along with BeatBo, one of our special switch toys.

Abbie’s movements are restricted due to a complex medical condition, and she is unable to communicate, so her mum was amazed when she was able to use the Lifelites Eyegaze to paint a picture – just using her eyes!

Amelia was delighted when we donated a Mobile Magic Carpet to her hospice. She loved playing with the bright colours and moving images. Just look at that beautiful smile.

Addy has Cerebral Palsy, but that doesn’t stop her spending hours racing over the Mobile Magic Carpet in her wheelchair, which she was still able to play with despite her disabilities. It was wonderful to see her shrieking with laughter as she played with her carers.

William is unable to communicate but loves interacting with his carers when he plays on the Lifelites touchscreen computers at his local children’s hospice. It helps him build relationships even though he is unable to talk.

You can read more stories on our website at www.lifelites.org.
Noah has a rare genetic disorder known as H-ABC syndrome, which targets certain parts of his brain. It specifically affects his movement, and causes stiffness, poor muscle tone and a lack of control, and will get gradually worse over time. He receives Hospice at Home care from his local children's hospice service, ellenor.

Lifelites works hard to ensure that all of the technology we provide is portable, so that it can be used by these teams to reach as many children like Noah as possible. Noah has twice weekly visits from his team, who always take along his favourite piece of technology, an iPad.

Hannah Ives, assistant practitioner at ellenor said: “Noah absolutely loves the iPads. He enjoys listening to the music and watching the brightly coloured videos on it, and he’s able to watch it in whatever position he is comfortable in. We’re working on his head control at the moment so we put him on his tummy to encourage him to lift his head, which he can do for a short period of time. “We also encourage him to play some of the specialist cause and effect games which Lifelites installs on the iPads as we are trying to promote controlled movements. When he recognises that he can make something happen on the screen, it makes him want to do it again. It’s such a fun way of introducing gentle, controlled movement, which will benefit Noah as his condition deteriorates.”

Another one of Noah’s favourite pieces of Lifelites technology is the Mobile Magic Carpet. He is able to play games on it with his older brother in a fun and safe way with the assistance of his carers. Hannah said: “We put the football game on and one of us holds Noah and helps him kick the ‘ball’ and his brother can kick it back. It’s incredible that despite his disability, Noah can still enjoy a game of football with his big brother. It’s a wonderful way for them to have fun and build their relationship.”

In September 2019, Lifelites arrived at ellenor to deliver their 200th brand new package of special technologies for the children they look after. The staff couldn’t wait to use the new equipment with Noah including the most up to date Eyegaze. Hannah said: “We’ve never had an Eyegaze before and we’re so excited to see how he reacts to it. It will really benefit him, particularly as his condition deteriorates and movement gets more difficult for him.”

Can you donate to help us support more children like Noah? Visit our website to find out more about how you can fundraise for Lifelites: www.lifelites.org/get-involved.
Introducing the Tech Trunk

It is estimated that there are around 49,000 children who could benefit from children’s palliative care, but only around 10,000 are using existing hospice buildings. Hospice at Home services are a practical, cost-effective solution to reaching more of these children. They provide bespoke care and may include symptom control, practical nursing care, play and music therapy, end of life care and emotional support for all the family.

We wanted to do more to reach as many of these children as possible, so we have come up with a practical solution to support these services.

We wanted them to be able to take the benefits of our specialist technologies to even more children who need it, wherever they are receiving care. So, say hello to our latest innovation: it’s called the Lifelites Tech Trunk.

The Tech Trunk is a portable case packed full of our technology which can be easily moved around by the Hospice at Home teams as they visit children in the community. As with our hospice packages, each Tech Trunk is built around consultation with the hospice staff and the needs of the children they care for.

Here’s a snapshot of what’s inside the Tech Trunk:

- Our iPad bundle with drop-proof case packed full of specialist apps and games
- A Beamz music player which enables fun music making for all abilities
- An Eyegaze with a portable stand to play games and communicate as they never thought possible
- A wireless Virtual Reality headset to help them escape the confines of their condition into a land of make believe
- Switch operated toys for simple fun and games for all abilities

We also provide special training days and technical support for our Tech Trunk package and—as always—it’s all completely free of charge.
Alan said: “When he’s playing games, he escapes. He doesn’t know a lot about his condition, but he knows he’s different from other kids, and the games just take him away from it. He doesn’t think about his feeding tube and his medicines. However, we’ve started to notice him dropping the controller if he’s tired, which makes him frustrated. This new controller is perfect for him, and means he won’t lose that part of his life. We don’t have control of many things, but at least we can give him this.”

The Adaptive Controller forms part of Lifelites’ Interactive Entertainment Hub, which we offer completely free of charge to every children’s hospice across the British Isles. This is a portable unit packed full of accessible gaming technology, including Virtual Reality and a whole host of games.

Simone Enefer-Doy, our chief executive, said: “Children and young people in hospices like Shay often find that their opportunities to join in with the world around them are limited by disabilities, but this shouldn’t be the case. Many of them feel isolated and find it difficult to develop social skills, but gaming can change this. It helps form valuable friendships, and gives them a sense of respite and relief from the challenges they face.

“This is why it is so important. Lifelites is able to donate equipment like the Xbox Adaptive Controller which can be modified for individual users, to provide them with the best possible experience and the chance to control something for themselves.”

We’ll be delivering lots of Xbox Adaptive Controllers to the hospices we are donating packages to this year. Make sure you keep an eye on our social media pages to see more children like Shay enjoying them.

Lifelites is passionate about the impact that video gaming can have on children and young people like Shay, so we work hard to provide the right technology to help them continue doing what they love. That’s why we were delighted when we were approached by Microsoft with their new product, the Xbox Adaptive Controller.

This is heart-breaking for his family, as they recognise that gaming isn’t just a hobby for him. Shay’s Dad Alan says: “Video games have been fantastic for Shay. They keep him believing he’s a normal kid; he wouldn’t be able to play football with friends in the backyard, but he can play Fifa. It lets him compete on the same level, even with his disability.”

Lifelites is passionate about the impact that video gaming can have on children and young people like Shay, so we work hard to provide the right technology to help them continue doing what they love. That’s why we were delighted when we were approached by Microsoft with their new product, the Xbox Adaptive Controller.

This Adaptive Controller is designed specifically for those with disabilities and can be customised to suit the user. It can be connected to external controls which can be used more easily by those with impairments so it is perfect for children like Shay.

Can you help Lifelites donate more technology like the Interactive Entertainment Hubs? If you would like to support us in any way, please get in touch by emailing sdavies@lifelites.org or calling 0207 440 4200.
We work with every children’s hospice service across the British Isles, so wherever you are there is a Lifelites project for children near you.

Each of our packages of equipment and services are worth £50,000 over their four year lifespan. This includes the cost of the equipment, installation, staff training, technical support and equipment maintenance. After four years - funds permitting - we aim to provide the hospice with another completely brand new package of the latest technology. Here’s our proposed schedule for the next four years.

2019

- Acorns for the Three Counties, Worcestershire
- Brian House, Lancashire
- Christopher’s, Surrey
- EACH Treehouse, Suffolk
- EACH The Nook, Norfolk
- Ellenor, Kent
- Forget Me Not, West Yorkshire
- Haven House, Essex
- Jersey Hospice Care children’s unit, Jersey
- Julia’s House, Dorset
- Little Harbour, Cornwall
- Little Havens, Essex
- Noah’s Ark, Barnet, London
- Oakwell House, Jersey
- Richard House, Beckham, London
- The Donna Louise, Staffordshire
- Tŷ Gobaith, Conwy

2020

- Bluebell Wood, South Yorkshire
- Charlton Farm, Somerset
- Chestnut Tree House, West Sussex
- Claire House, Wirral
- Demelza Elyham, London
- Horizon House, County Antrim
- Isle of Wight Hospice at Home, Isle of Wight
- Jessie May Trust, Somerset
- Martin House, West Yorkshire
- St Elizabeth’s, Suffolk TBC
- St Oswald’s Children’s Service, Northumberland
- The J’s Hospice, Essex
- The Shakespeare Hospice, Warwickshire

2021

- Acorns in Birmingham, West Midlands
- Alexander Devine, Berkshire
- Demelza, Kent
- Helen House, Oxfordshire
- Julia’s House, Wiltshire
- Laura Johnson House, County Dublin
- Little Bridge House, Devon
- Naomi House & Jacksplace, Hampshire
- Pepper Nurses, Buckinghamshire and Hertfordshire
- Rebecca House, Isle of Man
- Shooting Star, Middlesex
- Tŷ Hafan, Vale of Glamorgan
- Zoe’s Place Coventry, West Midlands
- Zoe’s Place Liverpool, Lancashire
- Zoe’s Place Middlesbrough, North Yorkshire

2022

- Andy’s, Lincolnshire
- Butterwick Children’s Hospice, Durham
- Claire House Liverpool, Lancashire
- Derian House, Lancashire
- EACH Milton, Cambridgeshire
- Francis House, Greater Manchester
- Hope House, Shropshire
- Jigsaw, Cumbria
- Keech Hospice Care, Bedfordshire
- Rachel House, Kinross
- Rainbows Children’s Hospice, Leicester
- Robin House, West Dunbartonshire
- Saint Francis Young Adult’s Group, Essex TBC
- The Bridge, West Midlands
- The Children’s Trust, Surrey

If you’d like to donate to us and support any of these projects, please get in touch with us by emailing info@lifelites.org or call 0207 440 4200.
Lift for Lifelites Returns

Lift for Lifelites is fast becoming our signature fundraising activity and was such a huge success in 2018 that we decided to do it all over again!

In 2018 our chief executive Simone managed 2,500 miles to a landmark in every county in England and Wales. She did this in just two weeks with the help of volunteer drivers in a weird and wonderful variety of transport. 2019’s Lift for Lifelites Returns saw Simone travelling further still – this time taking in the Isle of Man – to a whole host of new landmarks in a new range of fantastically eclectic vehicles. We’d like to say a huge thanks to everyone that came out in support of the challenge – driving, cheering and donating. These funds will help Lifelites continue to donate magical technology to children using hospice services up and down the country, creating life-changing experiences. Take a look at the pictures to see what we got up to…

If you’d like to read more about the challenge, please visit www.lifelites.org.
Help us change lives

There are lots of ways you can fundraise for Lifelites to help us change the lives of life-limited and disabled children in hospices in your area. Here’s just a couple of ideas...

Who’s your friend?

We’re a very small team at Lifelites, and it can take a lot of work for us to identify new supporters and build a relationship with them. However, as the old saying goes: “It’s not what you know, it’s who you know”. Lifelites latest campaign aims to expand our network and make connections which can help us continue to give children with limited lives, unlimited possibilities. Could you introduce us to someone who you think might be interested in supporting our work? Perhaps you know someone who is part of a sports club or community organisation, a friend who is an enthusiastic fundraiser, or someone at work who we could build a fundraising partnership with? If you could introduce us, we’ll do the rest.

Just think, if every one of our supporters encouraged one friend to help us in some way, that could potentially double our fundraising reach. Could you introduce us to someone who might be able to help? The impact this could have on the life-limited and disabled children we support would be invaluable.

Give a regular gift

We know it can be difficult to take time out of busy lives to fundraise; if only there was a quick and easy way to support your favourite cause? Well, we might have just the thing!

By making a regular monthly donation to help the work we do with children in hospices, you could become a Lifelites Benefactor. If you donate £10 a month, you could help fund vital training sessions for children’s hospice staff, helping them to make the most out of the Lifelites technology for the children they care for. A regular gift of £15 a month for a year could buy a waterproof and drop proof camera, so that children can record precious memories of the time they spend together at the hospice for their families to treasure.

It’s easy to set up and you’ll also receive a special Lifelites pin badge, as well as regular updates about the impact of your donation for the life-limited and disabled children we support.

Find out more by emailing info@lifelites.org or calling 0207 440 4200.

To find out more and download the sign up form please visit www.lifelites.org/get-involved/become-a-lifelites-benefactor. Thank you.
The magic in action

Children’s hospice staff help bring the benefits of our equipment to life with the children they care for. Here’s what some of them had to say about our technology…

Assistant Practitioner at ellenor:
“The Mobile Magic Carpet is the main attraction for our children. They love to play with each other on it. It promotes sharing, learning and interaction, and there is always so much laughter. It’s also amazing for our less able children who can just lie and watch the colours and listen to the sounds, and see the image react to their slightest movement.”

Activities Coordinator at EACH Treehouse:
“The Lifelites technology is used to bring some normality for our young adults using the Transition service. Those with limited understanding or no speech can use the Eyegaze, switches and computers to communicate their own needs, wishes and hopes for the future. It enables them to participate in their care plans and promotes independence, preparing them for the move to adult care.”

Senior Nurse at Brian House:
“Our children can live very isolated lives, but the Lifelites technology helps them to interact positively with their peers. It enables and empowers them to reach their full potential, helping them to develop communication, social skills and confidence.”

Play Co-ordinator at The Donna Louise:
“We used our Eyegaze with a young adult in end of life care who was able to play games with his parents and grandparents. This was such a meaningful experience as the young adult passed away soon after.”

Our finances

The work we do is only made possible thanks to the incredible generosity of our supporters, people like you who raise funds and donate to make a positive difference to the lives of life-limited and disabled children in hospices. We would like to say thank you so much to everyone who has supported us - we really couldn’t do what we do without you.

The support we receive is solely through the generosity of organisations and individuals. Lifelites does not benefit from any government grants or support.

The Masonic Charitable Foundation continues their generous donation of office premises and administrative services to Lifelites. This means our overheads are kept to a minimum so we can focus the funds we raise on providing and maintaining our life-enhancing technology.

Thank you to our patrons for their continued support: Peter Bowles, The Rt Hon the Earl Cadogan KBE CH DL, Anita Dobson, Esther Rantzen DBE, The Baroness Finlay of Llandaff, Joe Pasquale, Rick Wakeman, The Rt Hon Lord Young of Graffham DL, Jasmine Elcock, Sir David Wotton, Sarah Ezekiel, Dr Siobhan Thomas.

In kind supporters

Please support Lifelites with a donation

“The Lifelites Eyegaze allowed us to communicate and respond with Lee in a way that had not been possible before, in a way that we had not thought we would ever be able to do. It allowed our interaction to be two way and was a very special moment.”

Katie, Lee’s mum.

Celebrating 20 years
Simone Enefer-Doy was the first chief executive of Lifelites in 2006 and is still at the helm today. Here she looks back over the evolution of Lifelites, and the changes that have made the organisation what it is today:

“It seems hard to believe how far the organisation has come as we celebrate our 20th year. When I started we were donating PCs on desks, which were advanced technology at the time, but seem pretty basic now. Today, we donate a huge range of assistive technology to 10,000 children using 60 hospice services across the British Isles. What a transformation!

Revolutionary technology

“When I started, I knew we needed to up our game and focus on specifically reflecting the needs of the children for whom every second counts. We started to conduct in-depth research and developed close relationships with the hospice staff, gaining a thorough understanding of the challenges that the children faced, so that we could fully appreciate what technology they could benefit from. With this knowledge, we turned our attention away from the standard PCs to more specialist technology.

“Now we have technology like our iPad bundles that can go wherever the children are, even if they can’t get out of bed. Or our Eyegaze which helps children who may only be able to move their eyes to play games with their brothers and sisters, or even communicate with their carers and parents. The Mobile Magic Carpet and Virtual Reality bundles have also revolutionised the experiences these children have access to – kicking up autumn leaves, splashing in a fish pond, playing virtual football, climbing Everest or sitting under the Northern Lights.

“It was Eyegaze in particular that was the real game-changer. It really embodied everything I thought we were here to do - to give the children opportunities they wouldn’t otherwise have to live as full a life as possible. As soon as I saw it in action I knew we needed to incorporate it for children in hospices.

“Donating this sort of equipment would have been unthinkable 20 years ago, but over that time technology has become an integral part of our everyday lives, leading to a much more tech savvy workforce. We have seen hospice staff embrace our more specialist equipment and their enthusiasm has actively encouraged our ambitions to provide this life-changing tech.

Developing support services

To achieve these changes though, we needed to give consideration to the nature of our support services too. Providing technical support and maintenance has always been a cornerstone of our offer to ensure the equipment was kept in good working order for these children for whom every second counts. As our arsenal of technology evolved, we needed experts that were capable of maintaining this specialist equipment and eight years ago we brought a service company on board that has really helped us to achieve this. They provide expert technical support via a helpline and site visits all paid for by Lifelites.

Ultimately though, technology – as wonderfully clever as it is – is only as good as the knowledge of the person operating it and, if they do not feel comfortable with the Lifelites equipment, we know hospice staff will not get the most out of it. So we’ve also brought our training remit in house. Five years later we now have a professional team who have develop bespoke sessions on our wide variety of technology to ensure staff are well acquainted with its uses and applications – and we haven’t looked back since.

Magical memories

“I’ll never tire of seeing the impact that our technology has. The first time I walked through the door of a children’s hospice is an experience I’ll never forget. I saw the response to the technology and I knew we had something special, and that’s exactly what we’ve done and will continue to do.

“I believe that it’s a combination of our efforts to meet the special needs of the children, our proactive approach to find the right technologies, and including the hospices staff and families in our consultation and research, that has helped Lifelites to become what it is today: a partner in the care of life-limited children.

“Of course, none of this would have been possible without the hundreds of generous donors who put their trust in us and believed in what we were seeking to achieve.

And what of the future? Only technology will tell…
Then and now

Lifelites has come a long way in the last 20 years. Here's a snapshot of the differences between then and now:

1999

- Lifelites is born as a millennium project
- There were seven Lifelites projects at children's hospice services in England and Wales
- We had one major start up donor: The Royal Masonic Trust for Girls and Boys
- There was one co-ordinator overseeing the project
- The technology packages consisted of standard desktop PCs
- We offered limited training for care staff once every four years

Today

- Lifelites is a charitable incorporated organisation
- There are over 60 Lifelites projects for every children's hospice service throughout the British Isles
- We have hundreds of donors, supporters and volunteers who dedicate their time and resources
- We have six full time and four part time staff providing charity management, fundraising and PR, project management and training
- We donate bespoke packages of portable, assistive technology, suitable for use by children with a wide range of disabilities
- We have a dedicated in-house training team providing regular support for hospice staff
Lifelites has completely transformed over the last twenty years. Here, we’d like to take you on a journey back through time to see how it all came about:

1999
Lifelites is born as a millennium project out of a partnership between the Worshipful Company of Information Technologists and the Royal Masonic Trust for Girls and Boys. There were seven hospice projects in the first year.

2005
Fast forward to 2005 and the number of services has soared to 32. Lifelites is registered as an independent charity and begins fundraising to sustain the good work.

2006
Simone Enefer-Doy is invited to lead the new charity as its first chief executive.

2008
After Simone’s work with the hospices to conduct research into the most suitable technologies for use in the children’s hospice environments, Lifelites donates its first bespoke packages of specialist technology to suit the children’s abilities.

2011
See IT Work joins the team to help Lifelites provide ongoing equipment maintenance and technical support to keep the equipment working for the children for whom every second counts.

2012
Lifelites technology goes mobile thanks to the development of WiFi. There are now 44 children’s hospice projects for Lifelites to support.

2013
Eyegaze technology is piloted and is a complete game-changer for children with disabilities.

2014
Lifelites brings its training in-house and recruits its first training manager Caroline Jellyman.

2015
To the delight of children and hospice staff around the country, the Magic Carpet bursts on to the scene. Lifelites remit expands to include hospice at home and transition services.

2017
After reaching out to Jersey and the Isle of Man, Lifelites now donates technology and provides ongoing support to every one of the 60 children’s hospice services across the British Isles. Our new Virtual Reality (VR) projects are a huge success.

2018
Lifelites holds its biggest ever fundraising event to date – Lift for Lifelites – which raises over £100,000. We also introduce our Interactive Entertainment Hubs, making it possible to take gaming, virtual reality and cinema experiences wherever the children are in the hospice.

What does the next 20 years have in store?
If you’d like to fundraise for Lifelites and help us make the next 20 years as magical as the last two decades, please get in touch on 0207 440 4200 or take a look at our website: www.lifelites.org/get-involved.
A word from our friends

Lifelites is very lucky to have some wonderful friends; people who have contributed to the organisation’s success in a number of different ways. We spoke to just a handful of them to get their take on the Lifelites journey, and the work it does giving children with limited lives unlimited possibilities.

Lord Cadogan, patron of Lifelites and former president of the Royal Masonic Trust for Girls and Boys, founding partner of Lifelites:

In the year 2000 the management committee of the Royal Masonic Trust for Girls and Boys decided to allocate some of our funds to a new Millennium Project and it was decided that, with the help of the new IT Livery Company, we would examine the possibility of providing a comprehensive entertainment and education system for children under hospice care. When we originally looked at it there were around 30 hospices throughout England; we now provide to 60. Never in my wildest dreams did I imagine Lifelites would become what it has today.

Colin Knight, Lifelites trustee and member of the Worshipful Company of Information Technologists, founding partner of Lifelites:

“Our vision for Lifelites from the outset was clear, we knew there was a way we could use technology to greatly improve the experience of learning through play for children in hospices, ‘Edutainment’; but we could never have imagined the journey the organisation would come on. It’s amazing to see what has changed since it’s begun and how they’ve been able to keep up with rapid developments in technology, utilising them in the best possible way for the children. It’s been an absolute pleasure to be a part of.”

Dalton Leong, chief executive of The Children’s Trust and former chief executive of Shooting Star:

“The Children’s Trust is extremely proud to enjoy a wonderful relationship with Lifelites from the very beginning, 20 years ago. Lifelites has given the children and young people we support, with brain injury, the magical experience of technology; which provides the sights, sounds and stimulation which they might not otherwise have been able to experience. Technology has moved a long way over the years, and Lifelites has kept us up to date, always providing us with the latest software and equipment. Thank you. Here’s to the next 20 years!”

Dr Siobhan Thomas, Games Education expert and leader of the Enable Gaming Project with Lifelites:

“I’ve worked with Lifelites since 2013 on our Enable Gaming Project, which encourages up and coming game designers to include accessibility at the forefront of their designs. It wouldn’t have been possible without Lifelites and it’s incredible to see the enthusiasm that the organisation has for gaming, and the benefits it has for children with disabilities. They’ve really kept up with recent developments in technology and I’m so glad to be working with them. Happy Birthday Lifelites!”

We’d like to say a huge thank you to everyone who has played a part in the Lifelites journey. With your help, we have changed the lives of thousands of children. We couldn’t have done it without you.
